

Falls der Proxy nicht funktioniert

Ich hatte das Problem, das der Update prozesse nicht funktionierte Schuld war ein per default eingetragener mirror von ARCH linux.

```

Pi-KVM
-----
Welcome to Pi-KVM - Open Source IP-KVM based on Raspberry Pi

The root filesystem of Pi-KVM is mounted in read-only mode by default.
Use command "ro" to remount it as the rw-mode and "rw" to switch it back.

To prevent kernel messages from printing to the terminal use "dmesg -n 1".

To change root password use command "passwd-readonly set admin".
