

# Falls der Proxy nicht funktioniert

Ich hatte das Problem, das der Update prozesse nicht funktionierte Schuld war ein per default eingetragener mirror von ARCH linux.

```

I just discovered the problem though. The Australian mirror is broken. If I comment out m
au.mirror.archlinuxarm.org and use another one (I used the US(California one) then even
'pacman -Sy' also updated core/extra/community after switching to the US mirror (half in
the AU mirror, half the time it would work), so looks like the Australian mirror is somehow
broken. Not sure who to report that to.

Welcome to Pi-KVM - Open Source IP-KVM based on Raspberry Pi

Re: 404 error when upgrading with -Su
The root filesystem of Pi-KVM is mounted in read-only mode by default.
Use command "rw" to remount it in the RW-mode and "ro" to switch it back.

To prevent kernel messages from printing to the terminal use "dmesg -n 1".
Sorry about that, it's been fixed up now. Server had been rebooted by the provider and w
To change KVM password use command "kvmd-htpasswd set admin".
